

A portrait of Shuji Nakamura, a man with short dark hair, wearing a dark suit, white shirt, and red tie. He is resting his chin on his hand and holding a small purple object. The background is dark with a blue diagonal line.

# From Edison Lightbulb to LED Lighting

## A Public Lecture with Shuji Nakamura, 2014 Nobel Laureate in Physics

A series of breakthroughs over decades has paved the way for the emergence of LED light bulbs, and their ability to reduce the world's electricity consumption. Shuji Nakamura shared the Nobel Prize in Physics for the invention of efficient blue light-emitting diodes that have enabled energy-saving light sources. Come hear this world-renowned scholar discuss the past, present, and future of lighting.

**Monday, August 29, 2016**  
**George Street Playhouse**  
**9 Livingston Avenue**  
**New Brunswick, NJ 08901**

**Exhibits: 6:30 p.m.**  
**Lecture and Q&A: 7:00 p.m.**  
**Reception: 8:00 p.m.**

**Free and open to the public**

**Hosted by**  
**The Department of Physics and Astronomy**
