Index

ℓ-dimensional representation, 28
Young graph, 119
abelian, 17
adjoint representation, 61
alternating group, 24
associativity, 12
bijective, 17
Bloch states, 10
Cartan subalgebra, 67, 85
center, 19
character, 39
chiral superfield, 180
Clebsch-Gordon coefficients, 74
closure, 12
color SU(3), 91
commutes, 8
conjugacy classes, 18
conjugate, 18
connected component, 50
continuous, 50
coset, 19
covariant derivative, 136
covering group, 60
crystallographic, 46
defining representation, 70, 92, 107
direct product, 21, 47
direct sum, 31
discrete, 50
equivalence classes, 18
equivalence relation, 18
equivalent representations, 28
faithful, 28
field strength tensor, 141
flavor SU(3), 91
fully reducible, 31
fundamental representations, 105
fundamental weights, 105
gauge condition, 144
generates, 17
global symmetry, 133
goldstone boson, 165
great orthogonality theorem, 35
group, 12
group algebra, 117
Haar, 155
highest weight state, 68
homomorphism, 17
hooks, 122
Hurwitz, 155
ideal, 62
identity, 12
identity representation, 28
index, 20
invariant subalgebra, 62
invariant subspace, 29
irreducible representation, 29
isomorphic, 17
Jacobi identity, 57
kernel, 23
Killing form, 62
lattice vectors, 49
left coset, 19
Lie Algebra, 56
locally isomorphic, 60
Lorentz algebra, 64
Lorentz group, 63
Lorenz gauge, 144
Minkowski metric, 63
module, 9
normal subgroup, 20
order, 11, 20
parity invariant, 7
permissible placement, 127
permutations, 23
placquette, 139
Poincaré group, 63
point groups, 46
positive, 95
proper subspace, 29
pseudo-orthogonal, 63
quotient group, 20
rank, 85
rearrangement theorem, 16
reduced matrix element, 77
reducible representation, 29
reflexive, 18
regular representation, 37
relation, 18
representation, 9
roots, 86
semisimple, 62
simple, 62
simple root, 96
simply connected, 51
space, 46
spherical harmonics, 9
spontaneous symmetry breaking, 164
standard tableaux, 121
structure constants, 56
subgroup, 16
symmetric, 18
symmetric group, 23
temporal gauge, 148
tensor product, 47
topological groups, 50
transitive, 18
transpositions, 24
ultraviolet divergences, 136
unitary representation, 29
Vector coupling coefficients, 74
Vierergruppe, 25

You operator, 120
Young tableau, 119, 127
