Physics 116
Design Practical Oral Presentation

- Monday May 1, 2017 in recitation
- Pick one of the three practicals that you’ve already done, and prepare a 5 minute Powerpoint presentation (rubrics are attached)
- Presentation grade is a Group grade, and weighted in your grade as 2 design practical scores
- You should submit your graded design practical along with a printout of your slides on the day of your presentation. Your grade will reflect whether or not you improved your presentation based on the feedback you already received.
- Each member of the group is responsible for contributing to the presentation, the group grade must reflect a group effort.
- If you cannot come to class on Monday 5/1, you must see me in advance. This cannot be made up without prior arrangements, and you’ll receive a zero if you don’t come to class.
