

Directions for getting to the Physics Building from the New Brunswick Train Station by Campus Bus.

When you exit the train in New Brunswick, walk to the north end of the platform, opposite the direction you came if the train was heading away from NYC, in the direction you came if the train was heading toward NYC. Go down the steps at the end of the platform. If you were coming from the direction of NYC, the bus stop will be right in front of you. If you were heading in the direction toward NYC, at the bottom of the stairs turn left and pass under the tracks. You'll be taking the "Summer 1" bus from the NB Train Station @ Somerset Street. Exit the bus at Hill Center (one stop). From there walk past the round Physics Lecture Hall to the Physics Building. The train station and bus stop map, Physics Building area map, and the bus schedule are below.
