# Index

- $O(N)$ , **89**  
 1-forms, **156**
- accoustic modes, **141**  
 action, **45**  
 action-angle, **195**  
 active, **88**  
 adiabatic invariant, **226**  
 angular momentum, **8**  
 antisymmetric, **95**  
 apogee, **72**  
 apsidal angle, **75**  
 associative, **91**  
 attractor, **27**  
 autonomous, **22**
- bac-cab, **76, 98, 265**  
 Bernoulli's equation, **152**  
 body cone, **108**  
 body coordinates, **86**  
 Born-Oppenheimer, **126**  
 bulk modulus, **147**
- canonical transformation, **162**  
 canonical variables, **162**  
 center of mass, **9**  
 centrifugal barrier, **68**  
 Chandler wobble, **111**  
 closed, **174**  
 closed under, **91**  
 complex structure on phase space, **159**
- composition, **89**  
 conditionally periodic motion, **203**  
 configuration space, **5, 44**  
 conformal, **122**  
 conservative force, **7**  
 conserved, **5**  
 conserved quantity, **6**  
 continuum limit, **138**  
 contravariant, **244**  
 cotangent bundle, **20**  
 covariant, **244**  
 current, **253**  
 current conservation, **253**
- D'Alembert's Principle, **40**  
 deviatoric part, **147**  
 diffeomorphism, **186**  
 differential cross section, **81**  
 differential k-form, **170**  
 Dirac delta function, **142**  
 dynamical balancing, **105**  
 dynamical systems, **22**
- eccentricity, **72**  
 electrostatic potential, **56**  
 elliptic fixed point, **30**  
 elliptic integral, **33**  
 Emmy Noether, **247**  
 enthalpy, **158**  
 equation of continuity, **151**  
 ergodicity, **205**
- Euler's equation, **152**  
 Euler's equations, **107**  
 Euler's Theorem, **92**  
 exact, **156, 174**  
 extended phase space, **6, 180**  
 exterior derivative, **173**  
 exterior product, **170**
- fixed points, **26**  
 form invariant, **188**  
 free energy, **158**  
 functional, **45**
- gauge invariance, **57**  
 gauge transformation, **57**  
 generalized force, **17**  
 generalized Hooke's law, **147**  
 generalized momentum, **48**  
 generating function of the canonical transformation, **182**  
 generator, **95**  
 Gibbs free energy, **158**  
 glory scattering, **82**  
 group, **91**  
 group multiplication, **91**
- Hamilton's characteristic function, **191**  
 Hamilton's equations of motion, **52**  
 Hamilton's principal function, **191**  
 Hamilton-Jacobi, **191**  
 Hamiltonian, **51, 157**  
 Hamiltonian density, **239**  
 hermitean conjugate, **118**  
 herpolhode, **110**  
 Hodge dual, **258**  
 holonomic constraints, **13**  
 Hooke's constant, **148**  
 hyperbolic fixed point, **28**
- identity, **91**  
 ignorable coordinate, **48**  
 impact parameter, **79**  
 independent frequencies, **204**  
 inertia ellipsoid, **109**  
 inertia tensor, **98**  
 inertial coordinates, **86**  
 integrable system, **201**  
 integral of the motion, **201**  
 intrinsic spin, **189**  
 invariant plane, **109**  
 invariant sets of states, **26**  
 invariant torus, **207**  
 inverse, **87, 91**  
 involution, **201**
- Jacobi identity, **166**
- kinetic energy, **7**  
 Kronecker delta, **87**
- lab angle, **108**  
 Lagrangian, **36**  
 Lagrangian density, **142, 233**  
 Laplace-Runge-Lenz vector, **76**  
 Legendre transformation, **157**  
 Levi-Civita, **95**  
 Lie algebra, **168**  
 line of nodes, **112**  
 Liouville's theorem, **169**  
 logistic equation, **22**
- magnetic vector potential, **56**  
 major axis, **72**  
 mass matrix, **19, 53**  
 material description, **150**  
 mean motion Hamiltonian, **227**  
 minor axis, **72**  
 moment of inertia, **100**

momentum, **5**  
 natural symplectic structure, **179**  
 non-degenerate, **180**  
 nondegenerate system, **204**  
 normal modes, **124**  
 nutation, **117**  
  
 oblate, **111**  
 optical modes, **141**  
 orbit, **5**  
 orbital angular momentum, **189**  
 order of the dynamical system, **22**  
 orthogonal, **87**  
  
 parallel axis theorem, **100**  
 passive, **87**  
 perigee, **72**  
 period, **23**  
 periodic, **23**  
 perpendicular axis theorem, **103**  
 phase curve, **21, 26**  
 phase point, **21, 25**  
 phase space, **6, 20**  
 phase trajectory, **182**  
 Poincaré's Lemma, **175**  
 point transformation, **38, 162**  
 Poisson bracket, **165**  
 Poisson's theorem, **169**  
 polhode, **109**  
 potential energy, **7**  
 precessing, **117**  
 precession of the perihelion, **73**  
 principal axes, **104**  
 pseudovector, **96**  
  
 rainbow scattering, **81**  
 reduced mass, **66**  
 relation among the frequencies, **204**

rotation, **89**  
 rotation about an axis, **89**  
  
 scattering angle, **79**  
 semi-major axis, **72**  
 separatrix, **30**  
 sign of the permutation, **170**  
 similar, **118**  
 similarity transformation, **118**  
 spatial description, **150**  
 stable, **26, 29**  
 Stokes' Theorem, **177**  
 strain tensor, **146**  
 stream derivative, **37, 150**  
 stress tensor, **145**  
 stress-energy, **237**  
 strongly stable, **27**  
 structurally stable, **26**  
 subgroup, **92**  
 summation convention, **166**  
 surface force, **145**  
 symplectic, **163**  
 symplectic structure, **22, 159**  
  
 terminating motion, **27**  
 torque, **8**  
 total external force, **10**  
 total mass, **9**  
 total momentum, **9**  
 trajectory, **5**  
 transpose, **87, 118**  
 turning point, **69, 70**  
  
 unimodular, **91**  
 unperturbed system, **210**  
 unstable, **28**  
  
 velocity function, **21**  
 vibrations, **127**

virtual displacement, **39**  
 viscosity, **151**  
 volume forces, **144**  
  
 wave numbers, **140**  
 wedge product, **170**  
 work, **7**  
  
 Young's modulus, **148**
